

GEO PARK BETS ON ROAD SAFETY IN VILLANUEVA

August 28, 2017. GeoPark, committed to community safety near to field operations, trained 55 people in the defensive driving course for motorcyclists that took place in May and July 2017 in Villanueva, Casanare.

These trainings included practical and theoretical activities such as the identification of unsafe conditions on the road, the proper use of protection elements, knowledge of current traffic regulations and the revision of road speed and behavior standards. With this initiative, the company continues to work on the training of safe habits and behaviors along the way to contribute to the reduction of accident rates on the region highways.

For GeoPark, this type of training in road safety is fundamental to strengthen safe road behavior and, through education and awareness, to reduce the risks of health and integrity of the inhabitants who are an active part of the development of the region.
