

GEO PARK MAKES ANOTHER ACADEMIC CONTRIBUTION FOR STUDENTS OF PETROLEUM ENGINEERING AND OTHER COURSES

70 people attended the fourth technical and professional talk given by the Company together with the SPE Comahue Student Chapter.

Neuquen – September 11, 2020 – GeoPark and the Comahue Student Chapter of the Society of Petroleum Engineers (SPE) held the fourth event of a cycle of professional presentations on Friday, September 11. The activity was headed by GeoPark Petroleum Engineer Sofía Malamud, who addressed the topic of "Monitoring and supervision in fields with secondary recovery" to an audience of 70.

Students from various universities and academic institutions from different provinces and regions of Argentina -as well as from other countries such as Chile, Bolivia and Peru- attended the event. During her presentation Ms. Malamud covered basic principles of waterflooding, recovery methods, factors that affect the operational efficiency of secondary recovery projects, monitoring and supervision, and pattern balancing. The GeoPark professional also shared experiences from her own career and academic paths.

"GeoPark has been sharing with us its experience and knowledge, which are of great value to us as students nearing the end of the degree," said Karen Quidel, a member of the steering committee of the SPE Comahue Student Chapter and one of the coordinators of the series of professional presentations. "The opportunity for professional, personal and academic exchange is of great value to us since it allows us to set goals for our next stage," she added.

As part of its mission to "Create Value and Give Back", GeoPark carries out this series of technical and professional talks, aimed mainly at students from the Petroleum Engineering course at the Comahue Universidad Nacional university, active members of the SPE Student Chapter and other special guests. In the meetings, attendees learn about how GeoPark carries out its operations and activities and have the valuable opportunity to discuss professional and academic experiences.

As part of its sustainability strategy, GeoPark promotes educational projects and activities in the communities that neighbor its operations, with the commitment of becoming the preferred neighbor and ally based on a sustainable relationship of learning and mutual benefit.

About GeoPark

GeoPark is a leading independent Latin American oil and gas explorer, operator and consolidator with operations and growth platforms in Argentina, Brazil, Chile, Colombia, Ecuador and Peru. As part of its mission to "Create Value and Give Back", the company develops sustainable social investment programs in conjunction with the State and local authorities and communities, which aim to promote positive changes in the areas it has activities in.
