

GEO-PARK PARTICIPATES IN CYBERSECURITY DISCUSSION

This activity for Neuquen students addressed the hidden risks of technology, and opportunities for academic and professional development.

Neuquen, Argentina – October 16, 2020 – GeoPark, the Digital Education department of the Neuquen Province Ministry of Education, IBM and the Infotech cluster held an online discussion on network security on October 8 with secondary school students in Neuquen.

Cybersecurity and information security specialists Marco Antonio Cabrera from GeoPark, Pablo Acevedo from IBM and Jesus Almada from Infotech – who have 55 years’ experience between them – spoke about the hidden risks of technology, protection from possible cyber-attacks and how to safely navigate in cyberspace. They also discussed opportunities for academic and professional development.

As part of its social management strategy, GeoPark promotes educational projects and activities in communities near its operations, with the commitment to continue being the neighbor and partner of choice based on a sustainable relationship of learning and mutual benefit.

About GeoPark

GeoPark is a leading independent Latin American oil and gas explorer, operator and consolidator with operations and growth platforms in Colombia, Peru, Argentina, Brazil, Chile and Ecuador. As part of its mission to “Create Value and Give Back”, the company develops sustainable social investment programs in conjunction with the State and local authorities and communities, which aim to promote positive changes in the areas it has activities in.
