

CORPORATE PRESENTATION

February 2024

DISCLAIMER

The information contained herein has been prepared by GeoPark Limited ("GeoPark", "we" or "us") solely for informational purposes. No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained herein and nothing shall be relied upon as a promise or representation as to performance of any investment or otherwise. The information in this presentation is current only as of the date on its cover. For any time after the cover date of this presentation, the information - including information concerning our business, financial condition, results of operations and prospects - may have changed.

This presentation includes forward-looking statements. Forward-looking statements can be identified by the use of forward-looking words such as "anticipate", "believe", "could", "expect", "should", "plan", "intend", "will", "estimate" and "potential," among others. Forward-looking statements including future capex, production growth and Adjusted EBITDA among other appear in a number of places in this presentation and include, but are not limited to, statements regarding our intent, belief or current expectations. Forward-looking statements are based on our management's beliefs and assumptions and on information currently available to our management. Such statements are subject to risks and uncertainties, and actual results may differ materially from those expressed or implied in the forward-looking statements due to various factors. Forward-looking statements speak only as of the date they are made, and GeoPark does not undertake any obligation to update them in light of new information or future developments or to release publicly any revisions to these statements in order to reflect later events or circumstances or to reflect the occurrence of unanticipated events.

This presentation includes forward-looking non-GAAP measures. The Company is unable to present a quantitative reconciliation of the 2023 Adjusted EBITDA because the Company cannot reliably predict certain of the necessary components, such as write-off of unsuccessful exploration efforts or impairment loss on non-financial assets, etc. Since free cash flow is calculated based on Adjusted EBITDA, for similar reasons, the Company does not provide a quantitative reconciliation of the 2023 free cash flow forecast.

Statements related to resources are deemed forward-looking statements as they involve, based on certain estimates and assumptions, the implied assessment that the resources will be discovered and can be profitably produced in the future. Specifically, forward-looking information contained herein regarding resources may include: estimated volumes and value of the Company's oil and gas resources and the ability to finance future development, as well as the conversion of a portion of resources into reserves.

The information included in this presentation regarding GeoPark's estimated quantities of proved, probable and possible reserves in Colombia, Brazil and Ecuador as of December 31, 2023; is derived, in part, from the reports prepared by DeGolyer and MacNaughton ("D&M"), independent reserves engineers. Certified reserves refer to net reserves independently evaluated by D&M. The reserves estimates in the reports prepared by D&M were prepared in accordance with the Petroleum Resource Management System Methodology (the "PRMS") approved in 2007 and revised in 2018 by the Society of Petroleum Engineers, the World Petroleum Council, the American Association of Petroleum Geologists, the Society of Petroleum Evaluation Engineers, the Society of Exploration Geophysicists, the Society of Petrophysicists and Well Log Analysts, and the European Association of Geoscientists & Engineers. PRMS proved reserves (1P) are estimated quantities of oil, condensate and natural gas from which there is geological and engineering data that demonstrate with reasonable certainty that they are recoverable in future years from known reservoirs under existing economic and operating conditions. PRMS probable reserves (2P) are those additional reserves which analysis of geoscience and engineering data indicate are less likely to be recovered than proved reserves but more certain to be recovered than possible reserves. PRMS possible reserves (3P) are those additional reserves that analysis of geoscience and engineering data indicates are less likely to be recoverable than probable reserves.

The accuracy of any resource estimate is a function of the quality of the available data and of engineering and geological interpretation. Results of drilling, testing and production that postdate the preparation of the estimates may justify revisions, some or all of which may be material. Accordingly, resource estimates are often different from the quantities of oil and gas that are ultimately recovered, and the timing and cost of those volumes that are recovered may vary from that assumed.

Reserves estimates prepared in accordance with SEC rules and regulations may differ significantly from reserves estimates prepared in accordance with PRMS guidelines.

LONG-TERM VALUE PROPOSITION

ENDURING
PRINCIPLES
AND APPROACH

of 40-50% of Free Cash Flow

10% CAGR CONSOLIDATED (2013-2024E)
16% CAGR COLOMBIA (2013-2024E)

* 2024 consolidated production guidance was adjusted from the previous 37,000-40,000 boepd to reflect the divestment of assets in Chile.

** As of December 31, 2023.

*** GeoPark operated wells 2006 - 2023.

RIGHT NEIGHBORHOOD

LLANOS 34: A WORLD-CLASS ASSET

OVERVIEW

- Block acquired in 2012 with no reserves or production
- 13 oil fields discovered
- 200+ gross wells drilled
- 170+ gross MMBBL produced
- Tigana & Jacana rank among top 10 producing oil fields in Colombia

2024 CAMPAIGN

- Drilling 18-20 gross development and injector wells, including 5-7 wells to continue the horizontal drilling campaign
- Drilling 1 exploration well

KEY METRICS

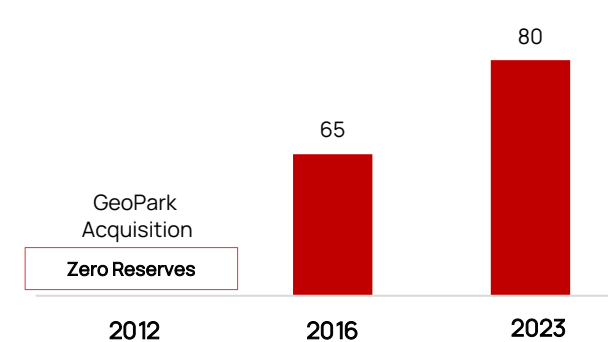

NET PRODUCTION AND RESERVES GROWTH

Net Production (BOEPD)

Net 2P Reserves* (MMBOE)

* 2023 D&M certified 2P reserves.

LLANOS 34: BIGGEST DISCOVERY IN THE LAST 20 YEARS IN COLOMBIA

GROSS OIL PRODUCTION PROFILE SINCE ACQUISITION

ACQUIRED WITH ZERO PRODUCTION AND ZERO RESERVES

*Net Cash Flow refers to Operating Netback less Capital Expenditures (excluding the effect of realized hedge losses or gains).

CPO-5: UNLOCKING THE UPSIDE

OVERVIEW

- Acquired in 2020
- Adjacent to core Llanos 34 Block
- Indico ranks among top 10 producing oil fields in Colombia

UPCOMING ACTIVITY

- Resume testing activities in the Halcon 1 exploration well

2024 CAMPAIGN

- Drilling 3-4 development and appraisal wells
- Drilling 1-2 exploration wells
- Acquiring over 230 sq km of 3D seismic

KEY METRICS

PRODUCTION & RESERVE GROWTH SINCE ACQUISITION

* Exploration resources correspond to GeoPark's aggregate Mean-P10 unrisks recoverable oil volumes in leads and prospects individually audited by Gaffney & Cline as of December 31, 2020, excluding leads and prospects drilled in 2021, 2022 and 2023.

** 2023 D&M certified 2P reserves.

*** EUR (estimated ultimate recovery) = Reserves plus cumulative production (2023 Year-end 2P and 3P Reserves were certified by D&M).

CPO-5 BLOCK: FASTEST GROWING ASSET IN COLOMBIA

GROSS PRODUCTION PROFILE SINCE ACQUISITION IN 2020

SIGNIFICANT EXPLORATION INVENTORY & POTENTIAL UPSIDE TO CONTINUE GROWING PRODUCTION & RESERVES

* Corresponds to the portion allocated to the CPO-5 Block in the Amerisur acquisition.

** Net Cash Flow refers to Operating Netback less Capital Expenditures (excluding the effect of realized hedge losses or gains).

LLANOS BASIN CHAMPION

2024 CAMPAIGN

LLANOS BASIN Consolidated Activity

3-4 Exploration Wells

Production
Increase
(4Q2023 vs 3Q2023)

Developing a complete structural and stratigraphic geological model for the U-sand formation

2024 CAMPAIGN

- Drilling 3-7 appraisal wells
- Drilling 2-3 exploration wells
- Focused on continuing delineation of the U-Sand formation

NEW GROWTH FAIRWAYS

Three New High-Potential Plays in Colombia & Ecuador

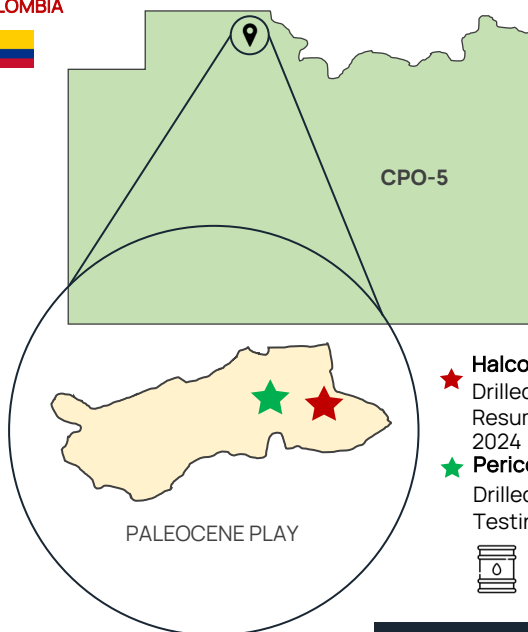

- Initial drilling activities started in 2H2023
- Combined traps (structural & stratigraphic)
- Current combined gross production of ~3,700 BOPD
- Play repeatability

- No oil-water contact identified
- Onshore, conventional short-cycle projects
- Good access to existing infrastructure
- Delineation to continue in 2024 with 7-11 gross wells

LLANOS CPO-5 BLOCK (Non-operated, 30% WI):

DELINEATING THE PALEOCENE PLAY IN NORTHERN CPO-5

COLOMBIA

- ★ **Halcon 1**
Drilled: Oct 2023
Resume Testing: Late Jan 2024
 - ★ **Perico 1**
Drilled: Dec 2023
Testing: Underway
- ~650 BOPD*

LLANOS 123 BLOCK (Operated, 50% WI):

GEOPARK APPROACH

STRONG TRACK RECORD OF CREATING VALUE THROUGH ACQUISITIONS

- Geology first: best basins, best rocks, best play types selected by G&G Team
- Achieve scale with value: production and reserves with upside
- Great economics: short-cycle, low-breakeven, value accretive
- Balanced portfolio: different plays, basins, countries, fluid types
